

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + Refrain from automated querying Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

ANNUAL STATEMENTS

OF THE

R

Railroad and Canal Companies

OF THE

STATE OF NEW JERSEY, comp of treasury

TOGETHER WITH

Report of the State Director of the United New Jersey
Railroad and Canal Co.,

FOR THE YEAR 1888.

TRENTON, N. J.:
THE JOHN L. MURPHY PUBLISHING CO., STATE PRINTERS.
1860

STATE OF NEW JERSEY, OFFICE OF COMPTROLLER OF THE TREASURY, TRENTON, April 1st, 1889.

To the Senate and General Assembly:

I have the honor to lay before you the report and statements of the State Director of the United New Jersey Railroad and Canal Company for the year 1888, and such reports of Railroad and Canal Companies for that year as have been received at this office.

These reports are made under the provisions of a law of this State, approved February 24th, 1852 (P. L. 1852, p. 82), and a supplement thereto, approved April 3d, 1873 (P. L. 1873, p. 121), requiring each railroad company in this State to transmit to the Comptroller of the Treasury, on the first Tuesday of January in each year, "a report, under oath or affirmation, of the President of said company, containing an account of their capital stock actually paid in, and the amount of funded and other debts of said company; also, of the cost of said road and equipments; also, of the operations of the said company during the year preceding up to the first day of January aforesaid; also, the expenditures for working the said roads, including repairs, maintenance of way, motive power and contingencies; also, the income from passengers, freight and other sources; also, the amount of dividends and how paid; also, the accidents that have occurred during said year on the road, and the cause of the same, with the names of the persons injured, and the nature and extent of their injuries; also, the names of the engineers and conductors under whose management such accidents have occurred, and whether such engineers and conductors are still retained in the employ of said companies."

Under the provisions of the same acts similar reports are required for each canal company in this State. Although the law does not require companies to report their mileage, an effort has been made to collect this information, and in the reports herewith submitted will be found, in nearly every instance, a statement of the number of miles operated in New Jersey by the respective companies.

In the cases of roads only a portion of which lie in New Jersey,

the items of "capital stock," "bonded debt," etc., are somewhat misleading, the figures given being those of the "capital stock," "bonded debt," etc., of the whole road, no division having been made to show the proportion pertaining to New Jersey.

For convenient reference, a statement has been prepared and appended to the reports, giving, in tabular form, the information found in the individual statements.

Very respectfully,

E. J. ANDERSON,
Comptroller.

REPORT OF THE STATE DIRECTOR OF THE UNITED NEW JERSEY RAILROAD AND CANAL COMPANY.

To the Governor of the State of New Jersey:

SIR—In accordance with the provisions of the law, I have the honor to transmit herewith my annual report as State Director of the United New Jersey Railroad and Canal Company for the year 1888. As in former years, this report will be found to contain an account of the number of miles in operation, together with the receipts and disbursements of the different divisions and branches leased by the Pennsylvania Railroad. For an account of the moneys received by the State, I respectfully refer you to the report of the State Treasurer, where the same will be found properly itemized.

With my predecessor, I can only give my unqualified approval of the wise and careful management of this business, in which the State has so large an interest. And the very high rank which this security steadily maintains is proof that the praise is fully justified, and I am pleased to add that the interests of the State and all concerned are secure while in the hands of gentlemen as wise, practical and conservative as those at present in charge.

Respectfully,

CHARLES BURROWS,

State Director.

RUTHERFORD, N. J., February 1st, 1889.

REPORT OF RAILROAD AND CANAL COMPANIES.

BELVIDERE DELAWARE RAILROAD COMPANY.

To the Comptroller of the State of New Jersey:

In obedience to a law of the State of New Jersey, approved March 27th, 1874 (Revision, p. 916), requiring annual reports to be made to the Legislature and transmitted to the Comptroller by the railroad companies of the State, the Belvidere Delaware Railroad Company presents the following report for the year ending December 31st, 1888:

Capital stock paid in	
Cost of road and equipments	\$4,601,288 55

The road extends from Trenton, N. J., to Manunka Chunk, N. J., a distance of sixty-eight miles.

It is leased to the United New Jersey Railroad and Canal Company. The lease is assigned by them to the Pennsylvania Railroad Company, and the annual rental is the "surplus of net earnings."

It is equipped mainly by themselves and operated by the Pennsylvania Railroad Company as part of their Belvidere Division, and the further information required by law is furnished by that company, and is annexed hereto.

State of Pennsylvania, Philadelphia City and County, ss.—W. H. Wilson, being duly sworn, on his oath says that he is President of the Belvidere Delaware Railroad Company, and that the foregoing statement is true and correct, to the best of his knowledge and belief.

W. H. WILSON.

THE BERGEN COUNTY RAILROAD COMPANY.

To the Comptroller of the State of New Jersey:

In obedience to a law of the State of New Jersey, approved March 27th, 1874 (Revision, p. 916), requiring annual reports to be made to the Legislature and transmitted to the Comptroller by the railroad companies of the State, the New York, Lake Erie and Western Railroad Company, lessee of the Bergen County Railroad Company, presents the following report for the year ending December 31st, 1888:

Capital stock paid in Bonded debt	\$200,000 00 2,000,000 00
Cost of road	\$607,972 14

The road extends from Rutherford to Ridgwood, a distance of ten miles.

It is leased to the New York, Lake Erie and Western Railroad Company, at an annual rental of \$24,000. The particulars of its operations and expenditures have been kept as a part of the general accounts of that company, and cannot be specified as applicable exclusively to the Bergen County Railroad Company.

It is equipped and operated by the New York, Lake Erie and Western Railroad Company, and the further information required by law is furnished by that company, and is annexed hereto.

State of New York, New York City and County, ss.—John King, being duly sworn, on his oath says that he is President of the Bergen County Railroad Company, and that the foregoing statement is true and correct to the best of his knowledge and belief.

ACCIDENTS.

January 9th.—Lawrence Stafford, age 56, while walking on track, at 5:56 A. M., near signal ball, at Paterson, was struck by train 19, C. B. Wood, conductor, engine 149, A. D. Rocket, engineer. He received injuries from which he died shortly afterwards. None of the trainmen knew of the accident.

February 5th.—Frederick Boyland, age 8, while walking along the track near Straight street, Paterson, at 5:48 P. M., one of his companions threw his hat over on west-bound track. Boyland stepped

on track right in front of train 5, R. M. Seymour, conductor, engine 37, E. Hicks, engineer. He was struck and instantly killed.

February 8th.—George Lewis, brakeman, age 34, while pulling a pin between two cars in wild train, C. I. Crane, conductor, engine 654, —— Bates, engineer, at 1:30 p. m., at Ridgewood, had right arm caught between bumpers, bruising flesh and breaking both bones between wrist and elbow.

February 21st.—Wm. Fallon, brakeman, age 21, in making a coupling in wild train, Isaac Cary, conductor, engine 538, Frank Hoar, engineer, had his first finger of left hand caught between bumpers, crushing it so badly that amputation was necessary.

April 27th.—Henry Ronalder, fireman, age 37, on extra train, Thos. Lemon, conductor, engine 554, Ed. Paddock, engineer, while putting coal in fire-box a big lump of coal rolled down on his right foot, bruising the toes badly. The accident happened at Ridgewood Junction, at 8:40 A. M.

May 7th.—Unknown man, age about 50, while sitting on end of ties, at 11:45 A. M., near Lafayette street, Paterson, was struck by train 17, Guy Price, conductor, engine 147, John B. Hay, engineer. He received injuries from which he died May 10th, at Ladies' Hospital, Paterson. Whistle was sounded repeatedly and bell rung, but the man paid no attention.

May 7th.—Martin James O'Melia, age 18 months, while playing on track near crossing, at 3:15 P. M., at Ridgewood, was struck by train "extra," P. L. Hull, conductor, engine 685, J. E. Beemer, engineer. The bell was rung and whistle blown, but the child did not get off the track, and the engineer could not stop in time to prevent the accident. He received injuries from which he died May 13th.

July 7th.—Joseph Bright, age 19, while attempting to jump on extra train, W. W. Adams, conductor, engine 557, W. Forman, engineer, at 5:40 P. M., at Ridgewood Junction, fell and had right foot run over and crushed, necessitating amputation.

July 31st.—Pasquale Euria, laborer, age 60, attempted to cross-bridge 4, just west of Paterson, at 3:05 P. M., ahead of train 6, A. McNeal, conductor, engine 36, C. Caskey, engineer. He was struck and received injuries from which he died shortly afterwards. Everything possible was done to prevent striking the man.

August 23d.—John Sealey, brakeman, age 20, while making a coupling in switch train, engine 681, at 3 o'clock A. M., at Hawthorne gravel pit, had his right arm caught between bumpers, fracturing it between hand and elbow.

September 5th.—Unknown man, train 37, J. Van Duzer, conductor, engine 107, J. Coots, engineer, struck and fatally injured an unknown man, at 4:57 p. m., just east of Undercliffe station. The man was standing on track looking at an east-bound freight train. The whistle was blown, bell rung, but he paid no attention.

September 13th.—Alexandrina Stephens, age 24, a passenger on train extra, remained on the train until it went down in the yard at Paterson, at 6:42 P. M. In alighting, stepped over on west-bound track and was struck and instantly killed by train 23, A. W. Penrose, conductor, engine 176, S. W. Evans, engineer.

October 15th.—Louis A. Courtade, 24 years of age, in jumping from train 10, F. Dolson, conductor, engine 46, Wm. Lewis, engineer, at 4:22 P. M., at Paterson, after the train had started, fell, bruising his head quite badly.

October 31st.—Peter Julius, brakeman, age 21, in making a coupling in switch train, engine 681, G. Gillson, engineer, at 12:35 A. M., at Paterson, was caught between bumpers on car and drawhead casting on engine, and so badly squeezed that he died shortly afterwards.

November 1st.—Miss Ellen McGeraghty, age 25, was struck and instantly killed by train 15, W. L. Davenport, conductor, engine 36, C. Caskey, engineer, at 5:10 p. m., at Straight street crossing, Paterson. The gates were down at the time, but she crawled under and attempted to run across the tracks ahead of the train.

November 20th.—Edw. Leitmayar, age 11, in attempting to drive across Cedar street crossing, Paterson, at 4:11 P. M., was struck by

train 27, D. King, conductor, engine 39, Chas. Sampson, engineer. The boy was thrown out and considerably cut and bruised about the head. The gateman was just lowering the gates at the time, but the boy drove under with the above result.

November 26th.—Wm. Truex, engineer, age 48, was struck and instantly killed by extra 542, —— Palmer, engineer, E. Wilcox, conductor, at 4:15 A. M., at Ridgewood Junction. None of the train men saw the accident, and it is supposed that Truex got off his engine, 542, and was struck, with the above result.

December 4th.—Peter Mabie Yard, conductor, age 30, in making a coupling in switch train, engine 171, Geo. Morgan, engineer, at 7:45 P. M., at Paterson, had thumb of right hand caught, tearing nail and flesh off first joint.

December 8th.—John J. Ruff, age 30, Reuben E. Ruff, age 22, and Blake E. Ruff, age 19, attempted to cross the tracks at Van Houten street, Paterson, ahead of train 50, J. H. Ostrander, conductor, engine 170, Wm. Early, engineer, at 5:28 A. M. The wagon was struck and two of the occupants, John and Blake, were instantly killed. The third, Reuben, was thrown out and received a bad scalp wound, and had right shoulder and leg bruised. Proper signals were given for the crossing.
